Subject: Re: Gold King Animas River Spill Infomation for Helth Care Providers

Hi Claire

As I mentioned to you previously, we received your request and this has been forwarded, along with the EPA 8/5 and 8/6 Animas River water sampling report to our Emergency Response Group in Atlanta for review. I will provide you with an update tomorrow morning.

Thanks

Chris

Hello Chris,

In regards to the Gold King Mine, Animas River Spill, San Juan Basin Health is requesting information for health care providers treating patients with exposure to the contaminated water along with general information for the public. At this time the Animas River has been closed by Sheriff Sean Smith, but residences are now experiencing yellow water being produced from their wells.

Secondly we would also like information for veterinarians treating pets/livestock that have had exposure to or consumed contaminated river water.

Please provide us with both written and verbal recommendations, a contact number for health care providers and veterinarians to call until this information is available, and a time frame for when this information can be expected from your office.

Thank you for your time and effort in this matter,

Claire Macpherson

Regional Emergency Preparedness and Response Coordinator

San Juan Basin Health Department
